TAC Agenda Topics and Project Updates

May 17, 2011 Meeting

Duluth-Superior Metropolitan Interstate Council

* = Approval Item

1. INTRODUCTIONS / AGENDA REVIEW

2. COMMITTEE BUSINESS

- Meeting Summary of April 19, 2011* (separate attachment)

3. GUEST SPEAKER – JIM HEILIG, DENNIS JENSEN, DTA

DTA Update: Multimodal Terminal and Challenges facing Service to Mall Area

The DTA will provide a status report on its effort to bring a multimodal transit terminal to Downtown Duluth and report on service challenges arising from Walmart expansion plans in Hermantown.

4. GUEST SPEAKER – JIM SKOOG, ST. LOUIS COUNTY STATEWIDE HEALTH IMPROVEMENT PROGRAM

Sixth Avenue East Health Impact Assessment

This health impact assessment examines the potential health effects of 6th Avenue East as it currently exists a four-lane roadway, as well as the effects from the proposed re-design into a 3-lane roadway with boulevards. The outcome of this assessment is to provide recommendations to increase positive health outcomes and minimize adverse health impacts on all the users of the roadway facility as well as on the surrounding neighborhood.

5. DRAFT OF THE 2012-2015 DULUTH AREA TIP *

The MIC is releasing the Draft 2012-2015 Duluth Area TIP for a 30-day public comment period. The changes in the TIP include modifications to the existing projects and the addition of the 2015 projects. An analysis of the fiscal capacity as well as air quality conformity review will be available in the Draft TIP. A public meeting will be held during this comment period.

6. BIKE AND PEDESTRIAN ADVISORY COMMITTEE UPDATE *

The BPAC met in May and discussed minor changes to the Bylaws, discussed the use of social media, particularly Facebook, as a discussion and communication tool for the committee as well as current bike and pedestrian projects, including Bike to Work Day, Sidewalk Study, Duluth Trail and Bikeways Plan and the soon to be released new Bike Map. Additional items discussed was the 6th Avenue East and London Road projects. Regarding the London Road project, the BPAC voted on a resolution of support for the redesign of London Road.

7. SAFE ROUTES TO SCHOOL UPDATE

MIC staff is finalizing the recommendations and cost estimates for the first 2 school sites (Denfeld

Duluth-Superior Metropolitan Interstate Council

and Laura MacArthur). In addition, MIC staff just recently found out about another round of Safe Route to School funding available. MIC staff will lead an effort with the SRTS Steering Committee to put together funding applications for this funding.

8. FEDERAL CPG FUNDING UPDATE

I have attached the four work proposals for your review. At the meeting, I will discuss steps that I recommend taking with each over the coming months. All four have indicated a full local 20% match toward the federal funds. Each is summarized briefly below.

- 1) City of Duluth – 6th AE Traffic Study (2nd St to Mesaba): A comprehensive traffic analysis is proposed that would serve as the design element for the work completed to date by the City that resulted in a schematic of the corridor that used CDBG funding. The concept is to turn the corridor into one that is easier for non-auto modes to use. \$50,000 was requested.
- 2) St Louis County – Intersection Control Evaluation Planning Study – Duluth Area: This “first of its kind” study would analyze a series of intersections that are either under the authority of the City of Duluth or the County to ascertain the appropriate traffic operational control with a focus on modern roundabout feasibility. The application of roundabouts may provide an improvements in both traffic operations and traffic safety. \$80,000 was requested.
- 3) Duluth Airport Authority – Air Service and Air Cargo Leakage and Expansion Analysis: The primary goal of this study is to maintain and potentially expand air service opportunities at the Duluth International Airport. With origin and destination data pulled from the airport, future growth markets can be identified and financial analysis performed to ascertain profitability of new markets. \$50,000 was requested.
- 4) Duluth Seaway Port Authority – Duluth Cruise Ship Dock Facility Study: This study proposes the construction of a cruise ship terminal adjacent to the Convention Center area or the Great Lakes Aquarium and its resulting traffic impacts landside at these locations. The study is a more focused look at an area of development and its impacts that was first analyzed within the MICs *Port Land Use Plan*, completed in 2006 as well as our *Downtown Modal Connections Study*, conducted in 2009. \$60,000 was requested.

9. PROJECT UPDATES**Travel Demand Model – Traffic Analysis Zone Update, Robert Herling**

MIC staff is presently working on delineating Traffic Analysis Zone (TAZ) boundaries that will be compatible with future deliveries of the US Census Bureau’s 3-year American Community Survey (ACS) data and 5-year Census Transportation Planning Products (CTPP) data. The MIC is responsible for defining these zones for all of St. Louis County, MN and Douglas County, WI.

Bike to Work Day – Friday May 20, 2011, James Gittemeier

The MIC is leading the sixth annual Bike to Work Day morning commuter events for the Twin Ports. The event will include 2 bike stations, one in Duluth at Lake Avenue and Superior Street and the other in Superior at Tower Avenue and Belknap Street. Both events will have

Duluth-Superior Metropolitan Interstate Council

refreshments, safety inspections, and bicycle commuter information. In addition, the DTA will be at the Duluth event for a bikes on bus rack demonstration. Both events will take place from 6:30am to 8:30am and are free and open to the public. No registration is needed.
